

Student Initiated (SI) Project Proposal

Name of Student:	Abdul Hamid			Admin No.:	2503696C
School:	☐ ASC ☐ BUS ☐ IIT ☐ DES ☒ ENG ☐ HSS	Current Year of Study:	☐ 1.1 ☒ 1.2 ☐ 2.1 ☐ 2.2 ☐ 3.1 ☐ 3.2	Diploma:	Mechatronics
Project Category:	☐ Entrepreneurship & Innovation ☐ Health & Fitness ☐ Sustainable Development ☐ Arts ☐ Language ☐ Cultural ☐ Social Issues ☒ Technology & Science ☐ Media Creation ☐ Others			If you have chosen others, please specify:	
Project/Competition Name:	NA				
Personalised Project Title:	Web Development with Python and JavaScript				
Target beneficiary/beneficiaries (if applicable):	NA				
My Learning Goals	<i>Learning Goal: E.g. to work on my marketing skills.</i> Please state at least 1 learning goal. Refer to Sample Proposal in LMS. 2 or 3 goals will suffice. I want to learn more about web development, networking, and the tools used by developers.				
What is my project about?	<i>What am I going to do? (50 words)</i> This project is about learning web development and networking through structured weekly lectures and hands-on tasks. This covers HTML, Python, JavaScript, and also some SQL, a widely used language for handling databases. <i>How am I going to do it? (100 words)</i> I will follow the CS50W lectures on edX/CS50's website. I will complete the problem sets after each lecture. If I encounter issues, I will use GenAI or online communities like Stack Overflow for help.				
	<i>E.g. Report, prototype, checklist, glossary of terms, reflection, draft designs, surveys, survey analyses, interview transcripts, etc. (50-100 words).</i>				

Guided Learning GTPI302

What will I show as evidence of my learning in my project portfolio?	• Completed projects/repositories • The final project (if I reach that stage)
What else would I like to say about my project?	<i>Share how this project is important or meaningful to you personally.</i> <i>E.g. I have never done marketing before. Now I have a product which I would like to market. I really hope to pick up some useful skills and ideas on how to market my product and get opportunity to meet some industry expert to mentor me.</i> <i>For engineers, knowledge of coding and problem-solving is valuable in many aspects of the field. Engineers also work with embedded systems and IoT, which require coding knowledge to implement.</i> <i>I have taken CS50x, a fundamental introduction to computer science that focused mainly on lower-level programming languages like C, and introduced others such as Python, JavaScript C++, SQL, HTML, and CSS. After taking that course, I am interested in learning more about web application development through this CS50W course. Since this Guided Learning opportunity has given me the chance, I will take it to learn and hone my knowledge in this area.</i>
